AJ Miller T. Perez

Software Quality Engineering Associate Manager @ Accenture |
Certified Lean Six Sigma Yellow Belt | CPACC
Metro Manila, National Capital Region, Philippines

Summary

I build quality into everything — the code, the culture, and the client experience. With 14+ years leading Software Quality Engineering across Legal, Banking & Finance, Healthcare, E-Commerce, and Energy, I've managed end-to-end QA programs for global clients, scaled cross-functional teams, and embedded quality as a strategic advantage. As a QA leader, I've driven measurable outcomes by aligning Agile and DevOps practices with business goals, implementing Lean Six Sigma-informed process improvements, and championing Web Accessibility (CPACC) and Responsible AI standards across product life cycles. I'm equally comfortable mentoring a team through a high-stakes release. What sets me apart is the ability to connect people, process, and technology — translating complex quality requirements into clear execution plans that stakeholders at every level can get behind. Core strengths: Test Strategy & Governance | Agile QA | Cross-functional Team Leadership | Risk-based Testing | Accessibility & AI Quality | Stakeholder Communication Gallup Top Strengths: Learner · Analytical · Focus · Responsibility · Achiever

Experience

Philippine Society for Quality, Inc. (PSQ)
Member
June 2025 - Present (10 months)

Accenture

Software Quality Engineering Associate Manager
October 2021 - Present (4 years 6 months)

- Oversaw operational metrics and the role of software quality test engineering manager to ensure high-quality deliverables
- Led transformation using Copilot and Gemini Gen AI to improve test planning efficiency

- Managed Selenium test automation rollout for a QA team of 20, reducing release cycle time by two weeks and collaborating with five cross-functional teams, and reducing manual testing hours by 120 per month
- Developed and implemented accessibility strategy resulting in improvement in compliance scores. Improved accessibility compliance scores from 72% to 95% within six months
- Led a team inclusive of PWDs
- Grew QA engineering team size by 25% within 18 months
- Increased certification (CPACC, Salesforce, GCP ACE, ISTQB) completion rate from 40% to 85% in just two months by launching targeted training initiatives
- Managed quality assurance throughout the software development life cycle
- Led test strategy development to align with project goals
- Led test planning efforts to define testing scope and objectives
- Managed defect tracking processes to ensure timely resolution
- Generated metrics reporting to track testing progress and quality
- Demonstrated effective team management to enhance productivity
- Promoted team collaboration to improve testing efficiency and outcomes
- Reported directly to the Director of Quality Engineering

RCG Global Services

Senior Software Quality Assurance Engineer

July 2016 - October 2021 (5 years 4 months)

Makati City, Philippines

- Conducted functional & regression testing for major US clients (Chicos FAS, One Call Care & Disney) to ensure software meets specified requirements
- Utilized Google Analytics data to identify user drop-off points, leading to targeted regression tests that reduced critical defects by 25%
- Implemented A/B testing on new features, resulting in a 15% increase in user engagement for a major client
- Authored operational runbooks for regression testing processes, which improved cross-team consistency and reduced test execution errors by 20%
- Applied agile methodologies to enhance testing processes
- Executed comprehensive software testing to validate application functionality
- Managed back-end data via SQL. Performed Google Analytics and Accessibility tests
- Handled high-pressure developer-to-tester ratio (10:1) while maintaining quality standards
- Conducted performance testing to assess application scalability
- Demonstrated technical communication skills

KFORCE GLOBAL SOLUTIONS INC.

Software Quality Assurance Analyst

April 2015 - July 2016 (1 year 4 months)

Ayala, Makati City, Philippines

- Conducted functional testing to ensure software meets requirements
- Implemented process improvements to enhance testing efficiency
- Pioneered Visual Management Boards for infrastructure automation projects at Macquarie Bank
